Subject: FW: Question on the PFAS Data Request...

Good Morning Andy,

In preparing to respond back to Region 7 I wanted to ensure I represented our expectations correctly. Catherine is referencing the data inventory call memo with the due date of 14 February 2020. In recent discussions with the PFAS team it has been mentioned that completion of the data inventory is not critical to the release of the National PFAS Data Explorer (NDPE) and so we haven't been pursuing that objective with as much vigor as the Places of Interest call memo. Does ORD still have the expectation of regions and programs to respond to the data inventory memo by 14 February 2020 or has this been delayed?

Thanks,

Alex

Hi Catherine,

I've passed this over to Alex Montilla in ORD who has a better handle on the due dates, etc. Copying him so he can reply.

Mike

Subject: Question on the PFAS Data Request...

Hi Michael, A few of us in R7 are meeting tomorrow to discuss the PFAS data request. Would you refresh my memory please, the data request that's due on 2/14/2020 is for the Regions to look at the list of 41 in the Excel spreadsheet, correct? Region 7 does not have any sites within that list of 41, so should we just send a response to PFASdata@epa.gov stating that we looked at the list and Region 7 has no sites on the list?

Then the second data request, if I remember correctly, ORD will be working on collecting the second request?

Thanks for refreshing my memory!
